

Mr Price's Christmaths sheet

Work out the answer to each problem. Split your answer up into 2 numbers to make co-ordinates.
Remember, the first number goes across and the second number goes up.

Example: $27+4=31 \longrightarrow (3,1)$

Join the dots up as you go along.

- $2 \times 6 = (\quad , \quad)$
- $40 - 17 = (\quad , \quad)$
- $11 \times 3 = (\quad , \quad)$
- $60 - 17 = (\quad , \quad)$
- $22 + 32 = (\quad , \quad)$
- $13 \times 5 = (\quad , \quad)$
- $100 - 24 = (\quad , \quad)$
- $7 \times 11 = (\quad , \quad)$
- $39 \times 2 = (\quad , \quad)$
- $90 - 1 = (\quad , \quad)$
- $40 + 48 = (\quad , \quad)$
- $7 \times 14 = (\quad , \quad)$
- $25 + 62 = (\quad , \quad)$
- $49 + 28 = (\quad , \quad)$
- $90 - 23 = (\quad , \quad)$
- $14 \times 4 = (\quad , \quad)$
- $9 \times 5 = (\quad , \quad)$
- $13 + 21 = (\quad , \quad)$
- $11 \times 3 = (\quad , \quad)$
- $8 \times 4 = (\quad , \quad)$
- $7 \times 3 = (\quad , \quad)$
- $44 - 22 = (\quad , \quad)$
- $36 \div 3 = (\quad , \quad)$

What do you see?
